"AIDS has made a huge impact on our society medically, socially, politically, legally, and psychologically. Sarah Watstein encapsulates this interdisciplinary issue into approximately 4,000 terms and explains them objectively, clearly, and readably for high school students, adults, and medical professionals. The terms include related diseases such as Kaposi's Sarcoma, treatments such as interleukin, jargon-"no code"- and slang-"bareback sex." The appendixes list statistics, toll-free telephone numbers, Web sites, nonprofit and government organizations, clinical trials, databases, and payment assistance programs.
